

Inspace Partnerships Talk with our Construction Trainees – 19/6/08

Warren Lubin and Steve Barrett from Inspace Partnerships kindly gave a presentation to over 50 construction learners at our Acton Site.

Warren, the Community Liaison Manager at Inspace Partnerships explained the set up of construction management companies and their work with sub-contractors. Warren went on to introduce his colleague Steve, who is currently a trainee site manager, for their South Acton contract. Steve shared his experience of being a Site Carpenter and the progression to his current role.

The Learners were encouraged to ask Warren and Steve questions, making it a lively event. This talk opened up the audience to the range of opportunities that are within the construction industry, from the trade's person and beyond.

From the feedback given, the event was a great success and we hope to invite more employers to share their knowledge. If you would like to get involved please contact:
